

## Indextus Risk Calibration Equity 20

December 2020

Provides UK investors with a mixed asset time series based on a set split between equity and bond constituents. The Indextus Risk Calibration Equity 20 has been designed to offer a transparent and liquid measure for calibrating risk models.

The time series is re-weighted monthly based on the defined split between equities and bonds. Equities are sub-divided equally between UK and global equities, while bonds are weighted the same across UK Gilts and global Sterling corporate bonds. The underlying holdings being accumulation units of the largest tracker funds within the relevant Investment Association sectors.
